

Business Management System

At Lambert Engineering Ltd (Lambert) we know our stakeholders judge us on more than the products and services we provide. To meet and exceed the expectations of all our interested parties we have, and maintain, documented objectives for each relevant level of our activities.

When establishing and reviewing these, within the framework of our BMS, we consider:

- Our legal obligations, including all applicable regulations
- The relevant clauses of the following standards included in our BMS
- The views of interested parties
- Our significant environmental aspects
- Occupational health and safety
- Emergency response and business continuity
- Information security
- Technological options
- Financial, operational and business requirements
- Tools such as the balanced scorecard

We are committed to improve our BMS by meeting, and where practicable, exceeding, all relevant legal and regulatory requirements, including any potential other requirements to which we may subscribe, and delivering the products and services our customers expect. To achieve this we:

- Maintain strong relationships with all our interested parties
- Ensure that resources are available to meet our strategic objectives
- Invest in, empower and develop our staff to fulfil their potential
- Carry out periodic self-assessments to evaluate the performance of our BMS
- Hold regular management meetings to determine and review measurable objectives
- Regularly review these policies to confirm continuing suitability
- Communicate our policies to promote a full understanding of our strategy and objectives

Ultimate responsibility for achieving our objectives lies with the Managing Director, however, our continuing success depends on everyone working as a team. Consequently, it is a mandatory condition of employment that all our people follow agreed procedures to enhance our performance at all times and aligned to recognised international standards

ISO 9001:2015 Quality Management Systems

Our objective is to provide profitable growth for the world's leading companies by supplying innovative, high quality and unrivalled bespoke automated production machinery in the most effective and efficient manner to deliver the best value. Our continuous improvement drive is focused through the Plan-Do-Check-Act (PDCA cycle) and throughout our management system. We also place an extremely high value on customer focus to deliver unrivalled service.

ISO 14001:2015 Environment Management Systems

As a general principle, our policy is that meeting the needs of the present should not compromise the abilities of future generations to meet their own needs. Lambert is committed to continual improvement of our environmental management and pollution prevention.

OHSAS 18001:2007 Occupational Health and Safety Management Systems

We consult with employees' representatives on health and safety matters to provide a premier working environment for all - people are our business. We are committed to protecting the health, safety and welfare of all persons under our control or who may be affected by our activities. This is achieved by continual improvement of our management of OHSAS to reduce hazards, the risk of injury and ill health.
