

Lambert announces new appointment to Board of Directors

We are now at that time of year when apprentice applications are starting to flood into Lambert and just to show how an apprenticeship can be your future, read on. The latest member of the Board of Directors at Lambert has just been announced as Nick Green, Tadcaster born and bred, a former student at Tadcaster Grammar School and who started his apprenticeship at Lambert in 1996 at the age of 16. After completing Lambert's 4 year apprenticeship, Nick qualified as a Mechanical Engineer then in 2001 was appointed Project Engineer and Manufacturing Manager in 2012.

Nick Green, Lambert's newest Director

Nick will join the Lambert Board of Directors on 01 March 2015 in the role of Production Director. **Warren Limbert, Managing Director of Lambert commented** *"Nick joining the Board of Directors is fantastic for the business and it is great to see home grown talent going straight to the top. Of the 6 members of the board, 5 are apprentice trained which just emphasises how successful the apprenticeship route into work is and the achievements that can be made."*

Nick's response to the announcement of his appointment *"It doesn't get much better than this and I am eager to take on my new role. Not for a minute did I think I would manage to achieve this pinnacle milestone. Since I started engineering in 1996 technologies and innovation have changed the work role dramatically especially now as we move into the 4th industrial revolution. For anyone wanting to be an*

engineering apprentice this is just about one of the most exciting times to start a career and as a business it is one of our core principles to promote engineering and engage the youth of today in what is such an exciting industry to work in."
